

Computer Programming II — Homework Assignment #1

The class `vector` defined in `vector.h` implements parts of STL class `vector< int >` in Visual C++ 2019. Please write member functions `fill` constructor, copy constructor, `assign` and `resize` which implement `fill` constructor, copy constructor, `assign` and `resize`, respectively, in STL class `vector< int >`.

The output should appear as follows:

[illegible]

There are 0 errors.
